Conclusion

Malegaon Corporation Web Application was in the scope of the activity. It was observed that Ascentech has currently resolved all previously identified vulnerabilities.

Sr.no	Vulnerability Name	Severity	Final Status
1	Missing Security Headers (Content-Security-Policy, Permission-Policy, X-Content-Type-Option)	Medium	Closed
2	Out-of-date Version (J Query)	Medium	Closed
3	Out-of-date Version (Bootstrap)	Medium	Closed
4	Version Discloser (J Query)	Low	Closed
5	Version Disclosure (Bootstrap)	Low	Closed
6	Cookie Without Same Site Attribute	Low	Closed
7	Clickjacking	Low	Closed

The application can be hosted in the production environment.

General Recommendations

Production Hosting Environment

1. Deploy a Web Application Firewall ahead of your application facing the Internet and allow only relevant traffic to flow to your web server.
2. Fine tune the firewall rules such that only specific ports and IP addresses are allowed access to your application.
3. Enable, capture and retain application logs so as to be able to trace a security incident, in case it becomes necessary to do so.
4. Utilise services of 3rd party vendors to check for malicious activities like web defacement, etc.
5. Ensure that the Operating system, database and application is hardened.
6. Ensure that the Operating Systems, Database and applications is the latest stable version.
7. Application should undergo security testing annually or whenever any changes are implemented in the application functionality, whichever is earlier.
8. Ensure that all vulnerabilities, irrespective of their criticality, are resolved asap.

For Imperium Solutions,

Ms. Tasneam P
